"Women, good or bad—where they love much, forgive much."

Was he right? See the answer in this great picture.

ROVING MARINES GUESTS OF CITY

Go on Sightseeing Trip Through Canyon and to Artesian Park

Guests of Mayor Frank Francis and Commissioner Chris Eyzaguirre, party of Roving Marines was taken through the Ogden canyon yesterday afternoon to inspect Artesian park and to see the beauties of the canyon. Captain Robins was in charge of the marines.

W. S. Law, superintendent of the Utah-Idaho Central railroad, accompanied the boys, the trip having been made in a street car chartered for the occasion. Cigars and cigarettes were distributed among the "leathernecks."

Sights through the canyon caused many necks to crane but scenic beauties failed to draw the attention that a dainty maid, clad in overalls, who was at the Hermitage, did.

The trip was without excitement, except when one of the marines who was carrying a box of cigars, sat in a swing at the Hermitage, the swing, breaking and precipitating him to the ground. He and cigars escaped injury, however.

The marines said that the canyon surpassed anything that they had seen since they started their trip in February.

Most Beautiful Woman in Pictures Comes to the Ogden Theatre Sunday

When Howard Chandler Christy declared that Katherine MacDonald's title, "the most beautiful woman in pictures," was well earned and accounted for her beauty by saying it represented the glory of a dauntless character he little knew that Miss MacDonald's next story would enable her to enact a role of this nature.

In "The Turning Point," the latest attraction of "The American Beauty," which will be shown at the Ogden theatre, commencing Sunday, Miss MacDonald plays the part of Diana Tennant who greets the news of the loss of a fortune with indifference and becomes a professional society hostess. The events that come within her experience in this work are most unusual, and interesting.

National Guards May Belong to R. O. T. C.

Members of the Utah National Guard are eligible to membership in the reserve officers' training camp, according to advices received by Lieut. Col. Fred Jorgensen, adjutant general. The question has been discussed for some time as to whether a man could belong to the National Guard at the same time. The secretary of war has ruled as follows:

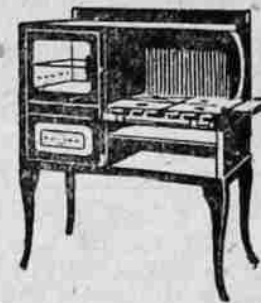

"Heretofore, students who were members of the national guard could not enroll for training in the reserve officers' training camp. Under this provision they may enroll and get credit for the required number of drills of a member of the national guard, even though absent from the national guard station, they will not get pay for the drill unless actually present."

"Members of the national guard may be excused from duty with their unit during the period they are required to attend the summer camp of the reserve officers' training camp prescribed as compulsory for members of the senior division. They may, however, be required to attend both the reserve officers' training camp and national guard camps the same year at the option of the governor of the state if the times the camps are held do not conflict and may draw pay for both."

DOLLAR'S VALUE LESS AS FRANCE PROSPERS

PARIS, May 14.—The prospects of a bumper crop this year, the improved condition of the French treasury, due to the growing excess of tax receipts over the estimates, and the purchase of French mining and other industrial shares by American and British investors are given in the best informed circles as the principal reasons for the sharp decline in the value of the dollar from 17 to 15 francs.

Another influential element was the covering by bourse operators, who had been speculating against the franc and found it advisable no longer to take risks against growing confidence in a French financial recovery. The best judges say they do not expect a further radical change in the relative values of the franc and the dollar.

SELL WAR NITRATE.

WASHINGTON, May 14.—Under authority of a joint resolution adopted recently by congress, the war department today released 100,000 tons of nitrate of soda for sale to the public. The selling price has been fixed at \$58.90 per ton, which is estimated to be the precise cost to the government.
